Press Note.

A large number of applications are being received in the Rationing Offices as well as in the Office of the Director of Food Supplies for (1) the conversion of 'B' Class ration into 'A' Class, (2) the substitution of rice or millets for the wheat component of rations, (3) the issue of full fine rice on ration cards and (4) special supply of cereals required for social functions, conferences, etc. While these requirements were till now being complied with as far as possible, it has become impossible in the present food position in the State, which calls for the strictest economy in the use of foodgrains, to meet such demands outside the regular rationing, as the stock of cereals available for consumption in the State is barely sufficient on the reduced scale of rations for two months.

With immediate effect, therefore, the substitution of rice or millets for wheat, the issue of full fine rice and any additional supplies outside regular rations are stopped and applications for the same will not be entertained.

The stock position of sugar is equally difficult, the quantity now available for consumption in the State being sufficient for 45 days only at the present low scale of issues. In the circumstances, the issue of any additional quantity of sugar for special occasions is definitely impossible and requests for the same will be automatically refused.

It is hoped that the public will appreciate the seriousness of the present food situation and extend their full co-operation to the Food Department by refraining from making requests involving increased consumption of cereals or sugar, as long as the present emergency lasts.
